Projects

NexusAgent – Autonomous AI Task Execution Platform | GitHub **Mar '26 – Present**

- Designed a multi-agent AI system enabling autonomous execution of web-based tasks by coordinating Planner, Browser, Data Extraction, and Analysis agents across 10+ dynamic websites.
- Integrated browser automation using Playwright to navigate pages, extract structured data, and process 200+ web elements per task with automated workflow execution.
- Engineered an intelligent task-planning pipeline leveraging LLM-based reasoning to convert user goals into structured action sequences, reducing manual research effort by ~40%.

Tech: *Python, FastAPI, Next.js, Playwright, PostgreSQL, Redis, Docker, Ollama (LLMs)*

LifeOS – AI Personal Life Operating System | GitHub | Live **Dec '25 – Feb '26**

- Developed an AI-powered life management platform analyzing 1K+ behavioral data points to optimize productivity, health tracking, and task execution through ML-driven insights.
- Implemented predictive models for burnout detection and productivity forecasting achieving ~88% classification accuracy using time-series and behavioral analytics.
- Constructed an intelligent task planning engine that decomposes goals into structured workflows, improving task completion efficiency by ~35% through adaptive scheduling.

Tech: *Python, FastAPI, Next.js, Scikit-learn, PostgreSQL, Redis, Docker*

Training

Lovely Professional University **Jun '25 – Jul '25**

Pass Pro: Intelligent Password Strength Analyzer | GitHub | Certificate

- Expanded a machine learning–based password strength analyzer evaluating 10K+ password samples to identify weak patterns and structural vulnerabilities.
- Engineered feature extraction techniques analyzing password entropy, character diversity, and pattern frequency, improving strength classification accuracy to ~92%.
- Optimized preprocessing pipelines by removing noisy inputs and normalizing datasets, reducing false strength predictions by ~25%.

Tech: *Python, Machine Learning, Streamlit Pandas, NumPy Data Analysis*

Certificates

- Build Generative AI Apps and Solutions with No-Code Tools | ***Infosys*** **Aug '25**
- Introduction to hardware and Operating System | ***IBM*** **Sep '24**
- The bits and bytes of computer networks| ***Google*** **Sep '24**

Skills

- **AI/ML/DL:** Regression, Classification, Clustering, Neural Networks
- **Languages:** Java,Python, JavaScript
- **Frameworks:** NumPy, Pandas, Polars, Scikit-Learn, Seaborn, Matplotlib, Flask,FastAPI
- **Tools/Platforms:** VSCode, Jupyter Notebook, Power BI, N8N
- **Database:** MySQL, MongoDB, PostgreSQL
- **Soft Skill:** Collaborative Leadership, Cognitive Flexibility, Intellectual Humility, Adaptive Communication

Education

Lovely Professional University Punjab **Aug '23 – Present**

*BTech in Computer Science and Engineering — **CGPA: 7.03*** *Jalandhar, Punjab*

Apeejay School **Apr '21 – Apr '22**

*12th Science (CBSE) - **62%*** *Jalandhar, Punjab*

Bokaro Public School **Apr '19 – Apr '20**

*10th (C B S E) - **65%*** *Bokaro, Jharkhand*
